## PROJECTS

### **INSQUBE — *Non-Life Insurance Portfolio Management***

Developer of the Non-Life Insurance Portfolio Management System. This system is developed to meet the requirement of non-life insurance companies inside Nepal to manage different types of insurance portfolios, insurance claim, reinsurance and accounting as governed by Nepal Insurance Board.

### **Pivotate — *AI based code-free app development system***

Worked as the backend developer to develop the AI based code-free application development platform using NodeJs and GraphQL.

### **Concerto Analytics — *Non-Life Insurance Portfolio Management***

Frontend and Backend developer of business modelling and simulation tools. Build and deploy backend Apis to Google Cloud Services using CI/CD tools and consume it by frontend for modelling and simulation of business data. Also developed powerBI custom visualization plugin for data integration.

### **SyntOMS — *Inhouse HR Management System***

Developer of inhouse HR Management systems for human resource and project management. Build the apis for mobile applications and publish them using WSO2 API manager.

### **Housing Reconstruction Damage Assessment**

Worked as an android and web developer in the project conducted by Central Bureau of Statistics (Government of Nepal) to collect, process and generate reports of data of house and household affected by the massive earthquake in 2015. Developed a mobile app based on ODK platform to collect the data using an android mobile device.

Developed the web application to process, manage and generate reports that helped Nepal Reconstruction Authority(NRA) to finalize the list of earthquake affected households.
